SFREP Releases New Hybrid Forms

The new 1004 Hybrid and 1004 Desktop forms are available now from SFREP.

The GSEs created a modified set of Scope of Work, Limiting Conditions, and Certifications that allow Fannie Mae and Freddie Mac to provide alternative appraisal processes.

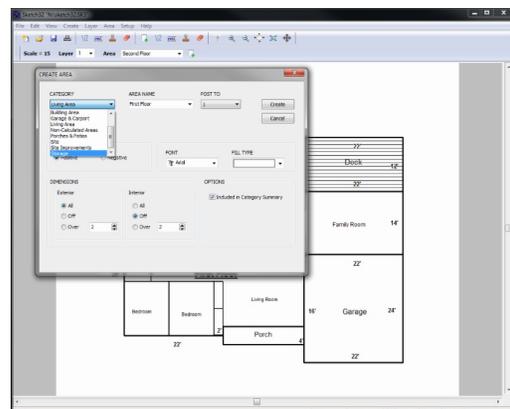

SFREP recently released Appraise-It Pro v1.9.1 and Appraise-It Classic v15.9.0 to include the URAR Hybrid and Desktop Appraisal forms. The traditional 1004/70 forms remain unchanged and will still be used the majority of the time. Be sure to contact your client to make sure you are using the correct form for your assignments.

For full details on the URAR Hybrid and Desktop forms, please review the GSEs' [Quick Reference](#) and the [Forms Overview](#).

Sketch32 - One of Many New Videos from SFREP

The SFREP staff has been busy creating and adding new video tutorials to our already impressive collection.

Most videos are only five-minutes long or less, but are chock full of valuable information that will help you make the most of your software. Take a few minutes and scroll through the list and then take a few minutes to view a video or two. You will find topics on new program features, what's new in the latest upgrade, how to use third-party products, and many new videos on how to use Appraise-It Pro.

It's a good idea to save this [link](#) and refer to it often to catch up on the latest additions to our YouTube channel. We have lots more coming!

Reminder:

- New and improved flood maps were recently released in both Appraise-It Pro v1.8.1 and Appraise-It Classic v15.8.1.
- SFREP offices will be closed on Monday, September 7 for the Labor Day holiday.
